❖ **Connectivity** ❖ **Data Center** ❖ **Cloud Services**

Established in 1994

Indonet has been at the heart of Indonesia’s digital transformation, building deeply connected digital infrastructure across the nation.

Leading into The Future

Driven by a strong commitment to excellence, Indonet continues to deliver comprehensive, reliable, and efficient digital infrastructure services that empower businesses in their digital transformation journey.

Digital Edge Partner

In 2021, Indonet has officially become a part of Digital Edge (Hong Kong) Ltd. Digital Edge is a data center platform company, established to accelerate the digital infrastructure transformation in Asia Pacific.

Experience the Latest in Connectivity, Data Center, and Cloud on Indonet Unified Solutions.

3 Service Pillars

Cloud Leadership

Listen on **Gartner Magic Quadrant** - Database Management System and Container Management.

Forrester Wave - Public Cloud and Foundation as a Service Provider.

World Class Infrastructure

3200+ Edge Nodes
30 Regions
89 Availability Zones

Integrate with Multiple Enterprise Solutions

Locally backed by **Principal and Distributors**, delivering round-the-clock technical assistance to meet your every need.

AI Content Generation

Create high-quality images, videos, and audio automatically to support marketing, content creation, and digital campaigns. Helps businesses produce engaging content faster with consistent quality.

AI Models & Machine Learning

Leverage ready-to-use AI models for tasks like text processing, recommendations, and data analysis. Enables businesses to gain insights, automate workflows, and enhance decision-making.

Cloud Infrastructure for AI

Power AI applications with high-performance infrastructure designed for speed, stability, and scalability. Ensures smooth deployment and reliable performance as your business grows.

Cutting-Edge connectivity facility, Innovate faster in a multi-connectivity world!

Maximize the benefits of digital infrastructure with Cloud Exchange, a platform that simplifies Multi Cloud, Multi DC, and Internet Exchange connectivity.
